Psychoanalytic Social Theory: Karen Horney (PSY) Psychoanalysis  
is fun!

The story of Albert Hofmann's life and the parallel story of LSD highlighting his academic journey, his research at Sandoz and his open minded, thoughtful philosophies about his discovery.

Describes the late 1960s spiritual quest of a California surgeon's son that took him to India and into an ashram, and his initiation into ancient yoga traditions; and discusses how his western background and views affected his journey.

Insight is the mind's magic in action, solving problems, understanding relationships, creating new images--with a speed and

certainty unavailable to ordinary consciousness. Breakthrough insights go even further. They take a quantum leap beyond ordinary creativity and our previous ways of looking at things--to a whole new method of resolving our difficulties. Almost all of us have experienced such moments in relation to work oriented or personal problems, and wish we could have them more often--in fact, we can. According to Willis Harman, Ph.D., president of the Institute of Noetic Sciences, and Howard Rheingold, human behavior columnist for Esquire, the main reasons we fail to have this kind of breakthrough experience more frequently are that we don't believe we can, and we don't apply the known techniques which can generate these insights. In Higher Creativity, the authors discuss this self-imposed limitation and argue persuasively for an enlarged image of everyone's creative potential. They examine the secret

history of inspiration through contemporary and historical accounts of profound creative breakthroughs, and finally they describe a surprisingly simple and reproducible sequence that has often triggered these insights for outstanding innovators in business, science, and the arts. These apparently special people became special by harnessing, sometimes quite accidentally, the awesome power of the unconscious in the service of higher creativity. Following their example and using historically validated procedures for reprogramming the unconscious, you can learn to capture the lightning for personal breakthrough in your own life.

'Any scientist who is no mystic is no scientist.' -- Albert Hofmann  
Still lecturing until his death at 102, Dr Albert Hofmann would have been a remarkable man even if he hadn't discovered the

chemical compound that changed the course of the 20th century -- LSD. Voted the greatest living genius in a 2007 poll, the self-described 'little Swiss chemist' is as much loved and respected for his personal nobility and modesty as he is for his chemical creations, which besides LSD, include chemicals used every day in maternity and geriatric wards the world over. This unique book collects, for the first time, a number of his more recent essays and lectures. Between them they present a comprehensive overview of Hofmann's relationship to his controversial creation, and reveal his profound mystical outlook, informed both by his own LSD experiences, and by a life lived through one of the most turbulent centuries in human history. The second section of the book contains essays and memoirs from some of the leading psychedelic thinkers of the 20th and 21st centuries, including Huston Smith, Myron
